

# 21<sup>st</sup>

## European Week of Regions and Cities

Thriving Regions, Stronger Europe

**Adapting Living Lab  
methodologies for  
sustainability transitions  
at regional scale**

Virtual Side Event

17

October 2023  
14:00-16:00

#EURegionsWeek

transformer-project.eu

/transformer\_eu

/transformer-eu

# AGENDA

1. **Introductory words by Prof Dr Matthias Kiese** (5 min)
2. **Presentation by Dr Georgia Ayfantopoulou** (15 min):  
The need for Cross sectorial LL approach to support transition to climate neutrality
3. **Presentation by Linda Maiwald:** Climate Neutral Görlitz 2030  
- Project TRUST (10 min)
4. **Presentation by Dr Artur Serra:** “Empowering everyone to innovate”, but how? - INTEGER Project (10 min)
5. **Panel Discussion** (30 min)
6. **Q&A** (20 min)

# TODAY'S SPEAKERS

21<sup>st</sup>  
European Week of  
Regions and Cities  
Thriving Regions, Stronger Europe

**Dr Georgia Ayfantopoulou**

Research Director at CErTH  
Deputy Director at HIT  
Thessaloniki Smart Mobility LL Leader  
TRANSFORMER Project

**Linda Maiwald**

Coordinator for Climate Neutral  
Görlitz 2030 at TRUST

**Dr Artur Serra**

i2CAT deputy Director, lead of the  
ENoLL Working Group on Social  
Innovation & Digital Rights, Member of  
the ENoLL Executive Board

**Do you know what a  
Transition Super-Lab  
is?**

**What comes to your mind when thinking about "Living Labs"?  
Use one word.**

**What comes to your mind  
when thinking about  
"Transition Super-Labs"?  
Use one word.**

# PRESENTATIONS

## Dr Georgia Ayfantopoulou

Research Director at CERTH  
Deputy Director at HIT  
Thessaloniki Smart Mobility LL Leader  
TRANSFORMER Project

# The need for Cross sectorial LL approach to support transition to climate neutrality

**Session: Adapting Living Lab methodologies for sustainability transitions at regional scale**

**Dr. Georgia Ayfantopoulou**

*Research Director at Centre of Research & Technology Hellas – CERTH  
Deputy Director Hellenic Institute of Transport – HIT  
Thessaloniki Smart Mobility LL Leader*

Email: [gea@certh.gr](mailto:gea@certh.gr)

**CERTH**  
CENTRE FOR  
RESEARCH & TECHNOLOGY  
HELLAS

# Structure of the presentation

- ① Improve ecosystem transition readiness through innovation
- ② Similarities and differences between Living Labs and Transition Super-Labs
- ③ Transition Super-Lab concept and process
- ④ Overview of TRANSFORMER TSL activities and first results

# 1.Region/City Led Innovation what is it?

**Goal:** Cities need to become SMART, CLIMATE NEUTRAL, ZERO POLLUTED until 2030 / 2050 > Innovative solutions are currently taking place in Europe

**✗ • Current situation:**

*Industry-led innovation* is speedy and when is adopted might have side effects that city/regions authorities do not expect and are not prepared to manage

**✓ • Solution:**

*City/regions-led innovation* aims at empowering leaders (authorities and policy-makers) to develop policies steering the introduction of innovative solutions

Τράκαρε το λεωφορείο χωρίς... οδηγό που κυκλοφορεί στα Τρίκαλα

Autonomous bus was in manual mode when it crashed in Whitby, Durham police say

City/regions-led innovation

How to enhance the transformation to digital and to accelerate their transition to climate neutrality embracing innovation

Innovative Cross sectorial Policy Response

# 1. Improve ecosystem transition readiness through innovation

**Goal:** Cities need to become SMART, CLIMATE NEUTRAL, ZERO POLLUTED until 2030 / 2050 > Innovative solutions are currently taking place in Europe

**✗** • Current situation:

*Industry-led innovation* is speedy and when is adopted might have side effects that city/regions authorities do not expect and are not prepared to manage

**✓** • **Solution:**

An ecosystem approach (LLs) is needed to provide cities/regions with the :

- **the capacity** for developing the policies that will stimulate & generalize cross sectorial innovative solutions taken up for maximizing the impact of innovation.
- **the knowledge** to prepare the right conditions for embracing innovation

Scooter giant Lime didn't disclose a braking issue that resulted in people breaking bones and damaging their teeth

Τράκαρε το λεωφορείο χωρίς... οδηγό που κυκλοφορεί στα Τρίκαλα

Autonomous bus was in manual mode when it crashed in Whitby, Durham police say

City/regions-led innovation

How to enhance the transformation to digital and to accelerate their transition to climate neutrality embracing innovation

Innovative Cross sectorial Policy Response

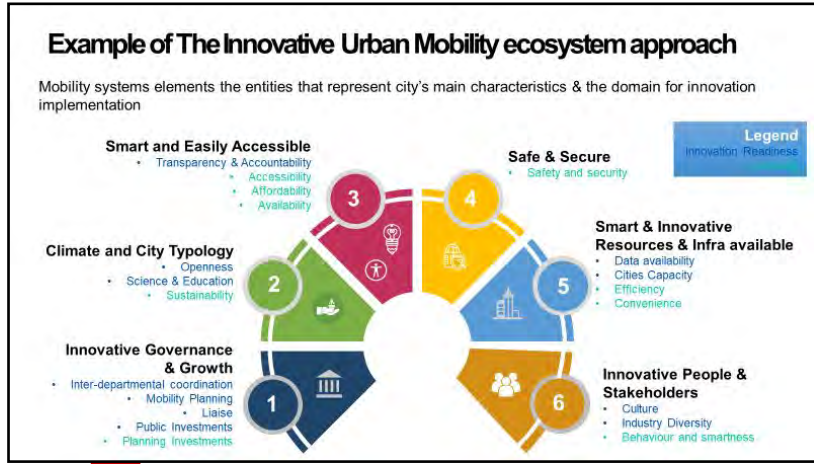

# Example of The Innovative Urban Mobility ecosystem approach

Mobility systems elements the entities that represent city's main characteristics & the domain for innovation implementation

# 1. City led innovation & readiness of mobility ecosystems to adopt innovation

## - Assess the Innovation Readiness score and the liveability level of a region/city

**YOU NEED TO MEASURE IT IN ORDER TO IMPROVE IT**

Sub-element	Question	Weight
Inter-departmental coordination	Q1	5.7%
Mobility Planning	Q2	11.7%
Liase	Q3	6.0%
Public Investments	Q4	16.5%
Openness	Q5	4.6%
Science & Education	Q6, Q7	6.28%
Transparency & Accountability	Q8, Q9	9.5%
Data availability	Q10, Q11	12.2%
Cities Capacity	Q12, Q13, Q14, Q15, Q16, Q17	13.7%
Culture	Q18, Q19, Q20	7.5%
Industry Diversity	Q21	6.3%

Ask cities to fill the survey

Calculate the Innovation Readiness Score and Liveability level of the city

# 1. City led innovation & readiness of mobility ecosystems to adopt innovation

## – Support city ecosystem common understanding on needs & priorities

**Use Case:** Real-time dynamic management of unloading operations including planning and booking

**City is 41% Ready for Innovation**

Conclusions for your city

### WHAT YOUR RESPONSES SHOW

- 1. According to your responses, the weakest element of your ecosystem is the Smart & Easily accessible.
- 2. More analytically, the city is not performing well in Liaise and Inter-departmental coordination.
- 3. In a more detail, lowest scores were identified considering the Q3 and Q8.
- 4. On the other hand, the strongest element of your ecosystem is Innovative People & Stakeholders.
- 5. The responses show that 'Science & Education and Industry Diversity are strong points of the Urban Mobility system.
- 6. Finally, it can be seen that city's main advantages are regarding Q19 and Q14.

### COMPARED TO THE OTHER SPROUT CITIES

- 1. Following a comparative approach, your city was found to be very weak in none element(s).
- 2. Looking in a lower level, city underperforms in Liaise, Openness points).
- 3. Related to SPROUT cities, your city is weak in Q3, Q5.
- 4. While the city is really strong in Smart & Innovative Resources and Infra available, Innovative People & Stakeholders fields).
- 5. Your city was found to outperform the SPROUT cities in the SPROUT areas in Science & Education, Data availability, Cities Capacity, Culture points).
- 6. Related to SPROUT cities, your city is strong in Q19, Q11, Q12, Q13, Q14, Q18, Q19.

## Room for improvement

Element	How is the transition pioneer city?	Where the city stands now?
Mobility Planning	<ul style="list-style-type: none"> <li>Public Participation to SUMP and SULP</li> <li>Linked with finance and political support</li> <li>Solutions are part of the planning</li> </ul>	<ul style="list-style-type: none"> <li>SUMP is under development</li> <li><b>SULP is not advanced</b></li> </ul> <p>Score 2/5</p>
Liaise	<ul style="list-style-type: none"> <li>Freight partnerships</li> <li>Citizen engagement platforms</li> </ul>	<ul style="list-style-type: none"> <li>Existence of multistakeholder platform (no regular operation)</li> <li><b>No support in emerging innovative solutions</b></li> </ul> <p>Score 2/5</p>
Data Availability	<ul style="list-style-type: none"> <li>City as LL using technologies such as Digital Twins</li> </ul>	<ul style="list-style-type: none"> <li><b>Has no data collection or surveys</b></li> </ul> <p>Score 1/5</p>

**City is 73% Liveable**

## SPROUT H2020 project

### WHAT YOUR RESPONSES SHOW

- 1. On the other hand, the strongest element of your ecosystem is Climate and City Typology.
- 2. The responses show that Sustainability and Safety and security are strong points of the Urban Mobility system.
- 3. Finally, it can be seen that city's main advantages are regarding Q19 and Q13.
- 4. According to your responses, the weakest element of your ecosystem is the Smart & Innovative Resources and Infra available.
- 5. More analytically, the city is not performing well in Convenience and Efficiency.
- 6. In a more detail, lowest scores were identified considering the Q4 and Q18.

### COMPARED TO THE OTHER SPROUT CITIES

- 1. While the city is really strong in none field(s).
- 2. Your city was found to outperform the SPROUT cities in the SPROUT areas in none points).
- 3. Related to SPROUT cities, your city is strong in Q1, Q3, Q14.
- 4. Following a comparative approach, your city was found to be very weak in none element(s).
- 5. Looking in a lower level, city underperforms in none points).
- 6. Related to SPROUT cities, your city is weak in Q12.

## 2. Similarities and differences between Living Labs and Transition Super-Labs

### -Are LL different from Transition Super-Labs?

According to their definitions, Living Labs and TSLs exhibit three key differences:

#### Living Labs:

**Scope and focus:** Living Lab scope is not limited as it operates as an intermediary in a real-life environment in specific domain.

**Terminology and approach:** Living Lab uses iterative feedback processes throughout a lifecycle approach in a specialized domain.

**Objectives:** To create sustainable impact and provide joint value to the involved stakeholders, without specifying particular objectives related to climate neutrality or sustainability.

*Need of new  
coalition  
category  
of Living Labs  
Super Labs  
dedicated to  
transition  
support.*

#### Transition Super-Labs:

**Scope and focus:** TSL operates as an ecosystem of actors from different domains aiming at **cross sectorial transformation towards climate neutrality** (mainly focused on **regional scale** challenges but cross-regional and cross border cooperation is suggested)

**Terminology and approach:** TSL benefits from a **collaborative governance** with the goal of including all relevant stakeholders from the quadruple helix for creating political legitimacy and acceptance for **long-term and fundamental systemic changes**.

**Objectives:** To create added value to cross-sectorial initiatives for **social and economic transformation** and provide *feasible solutions to complex regional transformation challenges*, with a focus on **climate neutrality and sustainability**.

## - How can adapted Living Labs methodologies contribute to Climate Neutrality?

Living Labs methodologies and converging community-based action-oriented participatory trans-disciplinary research structures are a key component of **open science** for **sustainable development**.

Bring together **citizens, institutions, industry, and research, engaging citizens** in social practices and connecting the big picture to local action.

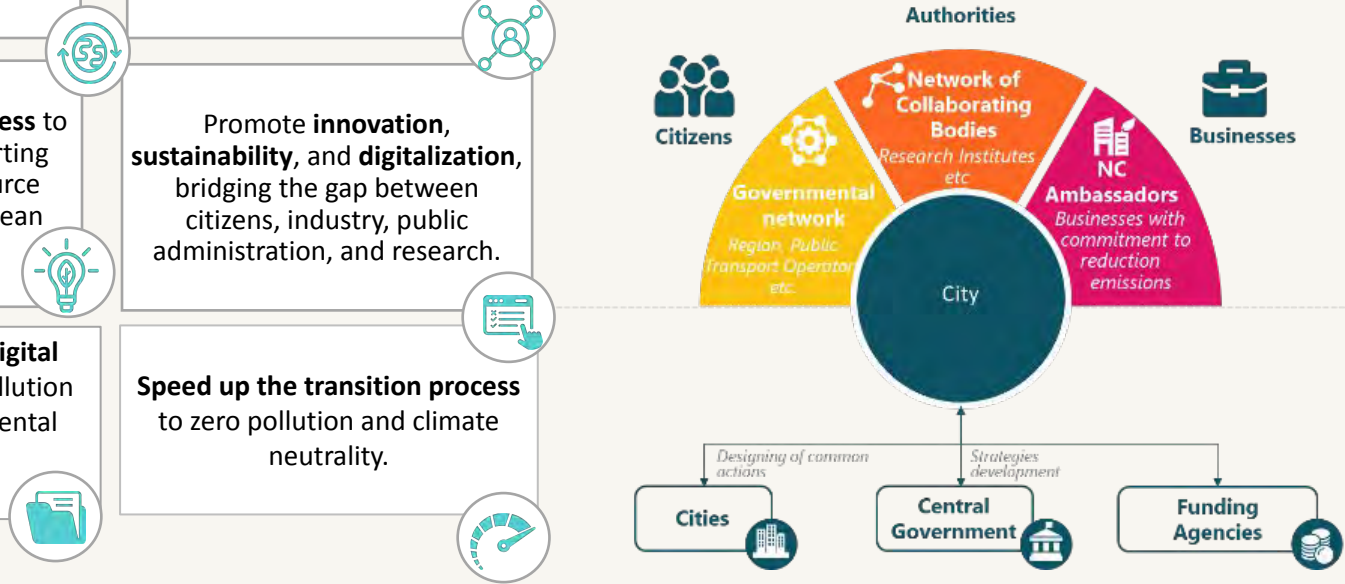

Facilitate **visibility** and **access** to open **knowledge**, supporting open data and open-source initiatives and the European Data Spaces.

Promote **innovation, sustainability, and digitalization**, bridging the gap between citizens, industry, public administration, and research.

**Test and demonstrate digital solutions** for reducing pollution and achieving environmental sustainability.

**Speed up the transition process** to zero pollution and climate neutrality.

- ✓ Bridge local and national ecosystems
- ✓ Propose solutions
- ✓ Build capacity

## 3. Transition Super-Lab concept and process

### - Transition Super-Lab

A Transition Super-Lab is an ecosystem of actors organized to accelerate the transformation towards climate neutrality through **innovation and cross sectorial synergies** on a regional scale. It benefits from a **collaborative governance**, operates in accordance to **systemic transformation** principles and utilizes **transition enabling methods and tools** in order to create added value to cross-sectorial initiatives for economic transformation and to provide feasible solutions to complex regional transformation challenges.

What are the main elements of a Transition Super-Lab?

Adaptation and application of enriched Living Lab methodologies

Aiming at large-scale systemic solutions for a rapid sustainable transformation

Applying a portfolio approach of measures (experiments) and using multiple leverage points for systemic change simultaneously

# 3. Transition Super-Lab concept and process

01

## STRENGTHENING LOCAL TRANSITION CAPACITY

**The Transition challenge**  
*What is the most important "topic" of the region for a fundamental regional transformation?*

**Identify stakeholders/civil society & map their relationships**  
*Who are the stakeholders/civil society groups that can contribute to reach the transition vision?*

Co-creation with stakeholders

**Assess the transition readiness of your region**  
*What your region needs to have for being transition ready?*

**What are possible transition pathways/scenarios & subgoals to reach the vision?**  
*What are our options for the future? What are feasible pathways?*

**Develop a transition vision & a goal for your region**  
*What future do you want for your region? Where does the region need to go?*

ITERATION LOOP

**Identify the weak points of your region**  
*What your region needs to do for accelerating readiness?*

**Identify suitable multi-leverage "pilot use cases" to test how pathways/subgoals can be reached**  
*What are the "pilot use cases"?*

ITERATION LOOP

**Achieve at the end of this step of the open innovation process in TSL**

- Consume preexisting knowledge
- Agreed transition pathways
- Weak points identification
- Stakeholders' dynamics
- Cross sectorial synergies

04

## SCALING-UP TRANSITION

**Define emblematic innovative transition projects**  
*How to define emblematic transition projects?*

**Maximise implementations & impact**  
*How to maximise impact?*

**Monitor & assess the success of the transition process**  
*Is the transition process successful for your region?*

ITERATION LOOP

MILESTONES

**Achieve at the end of this step of the open innovation process in TSL**

- Emblematic projects
- Suggestion of structural reforms
- New transition policies

02

## GEARING TRANSITION CAPACITY

**Stakeholders/civil society redefinition & coalition**  
*Why to redefine the stakeholders/civil society group?*

**Select the "pilot use cases"**  
*What "pilot use case" to select?*

**Examine feasibility of the "pilot use cases"**  
*How feasible are the selected pilot use cases?*

**Create value proposition for stakeholders & conflict resolution**  
*How to keep stakeholders engaged?*

**Achieve at the end of this step of the open innovation process in TSL**

- Feasible pilot use cases
- Engaged group of stakeholders

03

## ACCELERATING TRANSITION THROUGH INNOVATION

**Define "Quick wins"**  
*Why is important to define "Quick wins"?*

**Adoption of international innovative solution**  
*Why to adopt an international solution?*

MILESTONES

**Achieve at the end of this step of the open innovation process in TSL**

- Quick win definition
- Realization of real-life test experiments
- Action Plan

**Identify external investors**  
*Why to involve external investors?*

**Create & implement an Action Plan**  
*What are the actions that should be implemented for achieving the pilot use cases?*

Cross sectorial Transition model towards climate neutrality

# 4. Overview of TRANSFORMER TSL activities and first results

## - Challenges identified during the first activities

- ✓ Ensuring a balanced representation and participation of different societal groups (including marginalized groups)
- ✓ Creating value proposition for each group of stakeholders ensuring their motivation to participate over the long time of a systemic transformation
- ✓ Dealing with individual interests and conflicting ideas among the stakeholders

- ✓ Creating a common vision for a transformation on a regional scale among the variety of different stakeholders
- ✓ Integrating existing economic and political context (top-down approach) with a bottom-up perspective to keep the process open, participatory, and interactive

- ✓ Contribution to the goal of climate neutrality Potential for systemic transformation
- ✓ Regional character beyond merely local solutions and expected value for the region
- ✓ Experimental and innovative approach
- ✓ Potential for co-creation during the development phase
- ✓ Cross-sectorial approach

- ✓ Developing concrete actions through pilot use cases
- ✓ Identifying additional solutions for transforming multiple socio-technical regimes simultaneously
- ✓ Laying foundations for long-term implementation and establishment of a TSL (incl. governance arrangements and financing and funding options)

# 4. Overview of TRANSFORMER TSL activities and first results

- How does TRANSFORMER support the cross sectorial transition to climate neutrality?

Ecological Urban and  
Regional Development

Interdisciplinary Centre  
for Transformative  
Urban Regeneration

## Interdisciplinary Centre for Transformative Urban Regeneration (IZS Görlitz)

- Branch office of Leibniz Institute of Ecological Urban and Regional Development & Dresden University (TU Dresden)
- Focus on peripheralised small and medium-sized cities and regions facing transformation dynamics
- Implementing living lab approaches

Source: IÖR Media

Source: IÖR Media

Source: IÖR Media

# Complex challenge of local climate neutrality

 Cities are setting themselves increasingly ambitious climate protection targets

 Challenges:

- (Especially smaller) cities have limited capacities to develop and implement the necessary technical and social innovations
- Cities and regions feature specific geographic and economic characteristics

 Learning:

→ *There is no master plan for local climate neutrality!*

→ *Top-down approaches are not sufficient!*

# A local living lab approach to face local climate transition

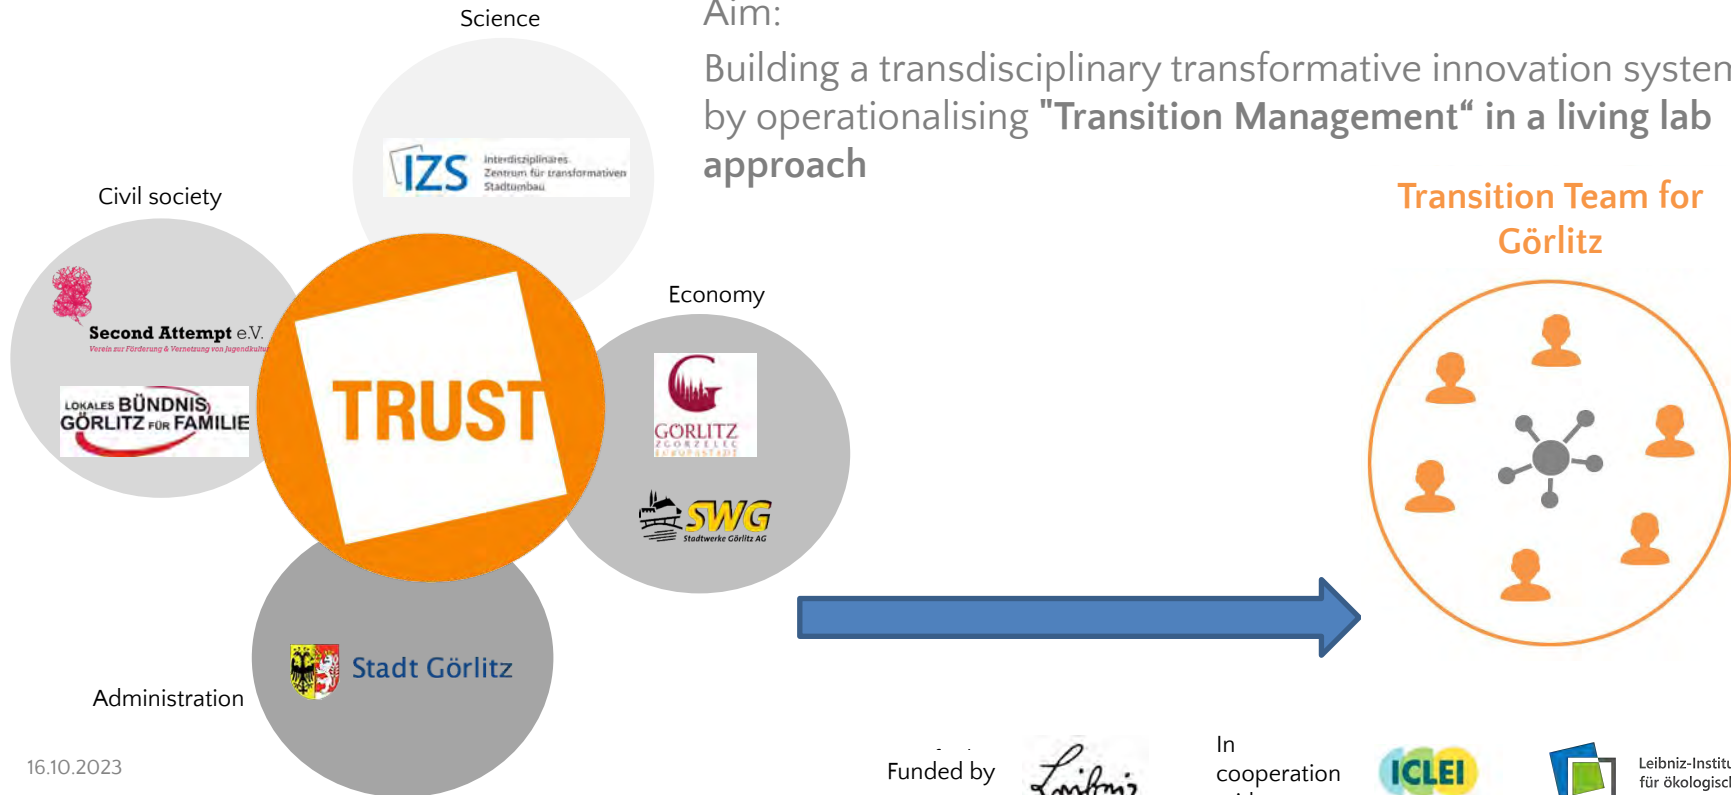

TRUST working hypothesis:

- ➔ Climate transition requires the engagement of all local sectors and their stakeholders.

# Transfer of Urban Sustainability Transition Knowledge: Towards Climate-Neutral Cities 2030 – The City of Görlitz as a Pilot

Aim:

Building a transdisciplinary transformative innovation system by operationalising "Transition Management" in a living lab approach

# A local living lab approach to face local climate transition

Forming a local living lab utilising transition management is useful for:

1. **Transforming local knowledge** on contextual realities and challenges into appropriate solutions.
2. **Integration of stakeholders** in climate action process
3. **Open opportunity** for innovation & local value creation

Source: IÖR Media

# Preliminary results

## On TRUST as living lab approach

- ✓ **Transition team** formed (working on a weekly basis)
- ✓ Publicly accessible **system analysis** jointly compiled
- ✓ **Successful implementation of a kick-off event as well as 4 transition arenas** so far, each with approx. 45 participants from the fields of politics, business, civil society, administration and science
- ✓ **Contact & support panel for local development relevant processes**, e.g. local energy planning
- ✓ **Communicator** between different urban processes and initiatives

# A critical reflexion

## On TRUST as living lab approach

- **Broad interest in the project**, as challenges around climate change mitigation are immanent & coordination lacks so far.
- **Collaboration between local sectors needs to be learned:** Finding a common language is key challenge
- **Key step: Recognize & understand different thinking logics and patterns**
- **Controversies about legitimacy project and its results**
- **(Peripheral) setting of the project as a special condition**

Source: IÖR Media
